Report on Residential Customer Terminations,
Arrearages, and Reconnections in Maryland
(October 2009 - September 2010)

I. EXECUTIVE SUMMARY

The Public Service Commission of Maryland (“Commission”) provides this Report comparing residential electric and gas customer termination, arrearage, and reconnection data in Maryland for the period October 2009 through September 2010 (“2009-2010”) with the same categories of data for the period October 2008 through September 2009 (“2008-2009”). Charts showing trends for a four-year period are included as a reference. The charts illustrate the change in residential termination notices issued, terminations performed, and reconnections completed over the past four years for the five major electric and gas utilities, *i.e.*, Baltimore Gas and Electric Company (“BGE”), Potomac Electric Power Company (“Pepco”), Delmarva Power and Light Company (“Delmarva”), The Potomac Edison Company d/b/a Allegheny Power (“AP”), and Washington Gas Light Company (“WGL”). The overall trend for most of the utilities has been an increase in the three measures (termination notices, terminations, and reconnections) from 2008-2009 to 2009-2010. During 2008-2009, the Commission temporarily limited customer terminations and required alternative payment plans in response to reports that a growing number of Maryland gas and electric customers were having difficulty paying their utility bills for the 2008-2009 winter heating season.¹ This intervention appears to have caused a decrease in these measures during the 2008-2009 period, although some of the alternative payment plans may have continued in effect during 2009-2010.

In 2009-2010, the gross arrearages owed by residential customers to all Maryland electric, gas, and gas and electric utilities (“Utilities”) exceeded 2008-2009 gross arrearage figures by 10.1 percent. Similarly, the average amount in arrears among customers with arrearages increased by \$9 (2.4 percent), from \$379 in 2008-2009 to \$388 in 2009-2010. The percentage of customers with arrearages increased 1.3 percent on a statewide basis. Residential termination notices increased by 3 percent in 2009-2010 compared to the immediately preceding year, and residential customer terminations were up by 0.9 percent.

The Commission attributes the growth in arrearages, at least in part, to the state of the economy, which made it more difficult for some customers to pay their utility bills, and to an increase in usage due to a colder-than-normal winter during 2009–2010. This situation was mitigated somewhat by lower commodity prices during this period than during the prior winter.

¹ See Case No. 9175, *In the Matter of Arrearage, Collection and Termination Practices of Maryland Electric, Gas, or Electric and Gas Utilities*. Through Order No. 82509, issued March 11, 2009, the Commission directed Utilities to refrain from terminating any residential customer’s gas or electric service for delinquent payment or outstanding balances. The Order was issued during the Commission’s investigation of the collection and termination practices of the Utilities, which investigation was prompted by a perceived rapid growth in utility arrearages and uncollectible balances. By Order No. 82628, issued April 24, 2009 in Case No. 9175, the Commission lifted the temporary delay of terminations, subject to certain payment plan parameters and termination procedures.

Report on Residential Customer Terminations,
Arrearages, and Reconnections in Maryland
(October 2009 - September 2010)

II. INTRODUCTION

This is the fifth Report on Residential Customer Terminations, Arrearages, and Reconnections in Maryland that the Commission is providing to the Senate Finance Committee and House Economic Matters Committee pursuant to Section 11(b), Chapter 5, 2006 Maryland Laws, 1st Special Session.² The Report compares residential electric and gas customer termination, arrearage, and reconnection data for the period October 2009 through September 2010 with the same categories of data for the period October 2008 through September 2009.³

Specifically, in accordance with Section 11, Chapter 5, 2006 Maryland Laws, 1st Special Session, the Commission obtained and analyzed the following data on a monthly basis from the Utilities:

- the number of residential utility termination notices issued;
- the number of residential customer terminations performed;⁴
- the number of residential reconnections completed; and
- the gross amount of residential customer arrearages for each class of customer.^{5,6}

This Report provides an analysis of aggregated arrearage, termination, and reconnection data for the Utilities for the period October 2009 through September 2010 as compared with similar data reported for the previous 12-month period. Included in the

² The first, second, third, and fourth Reports on Residential Customer Terminations, Arrearages, and Reconnections in Maryland were submitted to the Senate Finance Committee and House Economic Matters Committee in October 2007, June 2008, November 2008, and March 2010, respectively.

³ As required by law, the Commission examined the impact of fuel prices on residential customers, both electric and gas. See Case No. 9074, *In the Matter of the Investigation Required by Section 11, 2006 Maryland Laws, 1st Special Session, Public Service Commission – Electric Industry Restructuring*, Notice of Proceeding, issued August 17, 2006.

⁴ The Commission specified that the number of residential customer terminations reported by the Utilities should be limited to terminations for non-payment of bills. *Id.*

⁵ For purposes of this Report, unless otherwise noted, the Commission adopted as the definition of arrearage the point at which the Utility may impose a late charge, *i.e.*, if not paid within 20 days after the rendition of the bill. See COMAR 20.30.03.01A. This definition also is used by the Office of Home Energy Programs of the Department of Human Resources (“OHEP”), which administers energy assistance programs for low-income households. However, a slightly longer period (30/31 days) was accepted in cases where such data was more easily accessible to a reporting Utility. Arrearage balances were calculated: (i) in the aggregate for each Utility (referred to as “gross arrearage,” or the cumulative amount of money that is owed to the Utility and unpaid by the date after which late charges may accrue or longer if so reported by the Utility, *i.e.*, 30/31 days); and (ii) the average amount of arrearage among customers with an arrearage. An increase in a Utility’s gross arrearage can result from more customers falling into arrears, the same number of customers accumulating larger arrearages, or some combination of those two factors.

⁶The Commission also directed the Utilities to report the number of residential accounts with arrearages. Case No. 9074, Notice of Proceeding, issued August 17, 2006, *op.cit.*

Report on Residential Customer Terminations,
Arrearages, and Reconnections in Maryland
(October 2009 - September 2010)

Appendix to this Report are tables reflecting two years of comparative data from each Utility, as well as summary tables reflecting aggregated data from all Utilities. In addition, four-year trend data is provided for each major Utility as a reference. The charts illustrate the changes in residential termination notices issued, terminations performed, and reconnections completed over the past four years for the five major electric and/or gas Utilities. The trend for most of the Utilities has been an increase in the three measures from 2008-2009 to 2009-2010, to levels of residential termination notices issued, terminations performed, and reconnections completed closer to, or greater than, 2007-2008 levels.

III. REGULATORY BACKGROUND

A. COMMISSION REGULATIONS GOVERNING TERMINATION NOTICES AND RESIDENTIAL SERVICE TERMINATIONS

- Termination Notices. Under Commission regulations, a Utility must send to a customer, by personal delivery or first-class mail, a notice of termination at least 14 days before the date on or after which termination for non-payment will occur. *See* COMAR 20.31.02.05. Notices of termination must contain the following: (1) the name and account number of the customer whose service is to be terminated; (2) the address of the premises where service is to be terminated; (3) a statement of the reasons for the proposed termination; (4) the date on or after which the proposed termination will occur; (5) the charges for reconnection of service, if any; (6) a statement of the total amount due; (7) a statement of the customer's rights and remedies, which shall include a summary of the dispute procedures, the office address of the Utility, and the telephone numbers at which the Utility representatives who handle customer complaints may be reached; (8) a statement that it is the responsibility of the customer to notify the Utility if the customer is unable to pay for service in accordance with the requirements of the Utility's billing practices; and (9) a statement that it is the responsibility of the customer to notify the Utility that the customer, or an occupant of the premises, is elderly, handicapped, has a serious illness, or relies upon life-support equipment; a brief explanation of the special provisions regarding persons who are elderly, have disabilities, or are seriously ill or relying on life-support equipment; and an explanation of notification procedures.
- Terminations. The Commission has extensive regulations governing termination of service.⁷ The following is not a comprehensive overview, but rather is a summary of restrictions on terminations. Terminations are highest between April 1 and October 31 because of restrictions that apply during winter months, as described more fully below.

⁷ *See* COMAR Title 20, Subtitle 31.

Report on Residential Customer Terminations,
Arrearages, and Reconnections in Maryland
(October 2009 - September 2010)

- Restrictions for Serious Illness and Life Support Equipment: Electric or gas service may not be terminated for an initial period of up to 30 days beyond the scheduled date of service termination when the termination will aggravate an existing serious illness or prevent the use of life-support equipment of any occupant of the premises. The Commission's regulations contain procedures for certifying eligibility for this restriction, which require certification to the Utility by a licensed physician, and agreement by the customer to a payment plan. Among other requirements, before service is to be terminated, the Utility must attempt to make personal contact with the customer on at least two separate occasions, either by telephone or by visiting the premises and leaving a copy of the notice of termination. If personal contact is made, the Utility must inform the customer of possible sources of financial assistance and of the availability of alternate payment plans offered by the Utility. *See* COMAR 20.31.03.01.
- Restrictions for Elderly Persons or Persons with Disabilities: Upon receiving notice from the customer that the customer or an occupant of the premises to which the service is going to be terminated is an elderly person or a person with a disability, a Utility may terminate service to that premises only after the Utility has, at a minimum, attempted to make personal contact with the customer on two separate occasions by telephone or by visiting the premises and leaving a copy of the notice of termination. If personal contact is made, the Utility must inform the customer of possible sources of financial assistance and of the availability of alternate payment plans offered by the Utility. *See* COMAR 20.31.03.02.
- Winter Restrictions: The Commission's regulations provide that neither electric nor gas service to occupants of residential buildings may be terminated for non-payment of bills from November 1 through and including March 31 of the immediately succeeding calendar year unless the Utility first certifies to the Commission by an affidavit filed at least 24 hours before termination that the termination does not constitute a threat to the life or health of the residential occupants. The Utility is required to attempt personal contact at least twice between the date the notice of termination is mailed to the customer and the date on or after which service is to be terminated. Contact may be attempted either by telephone or by visiting the premises and leaving a copy of the notice of termination and either a Customer's Rights Pamphlet or a pamphlet which explains the customer's winter termination rights, including the Utility Service Protection Program⁸. The customer must be notified both in writing and

⁸ The Utility Service Protection Program provides certain protections against winter terminations to low income families that receive help with their heating bills from the Maryland Energy Assistance Program ("MEAP") and have paid down arrearages prior to the beginning of the heating season. *See* COMAR 20.31.05 for details of the USPP.

Report on Residential Customer Terminations,
Arrearages, and Reconnections in Maryland
(October 2009 - September 2010)

by personal contact, if made, of his/her rights and remedies, and must be informed of possible sources of financial assistance, the availability of alternate payment plans, and the Utility Service Protection Program. The arrearage for which termination is sought must be greater than \$200 for a single service Utility or \$300 for a dual service Utility, and the total amount due must be greater than the amount of the customer's deposit with the Utility. *See* COMAR 20.31.03.03.

○ Extreme Weather Restrictions: The Commission's regulations also provide protections against termination during three-day periods that may include extreme hot or cold temperatures. Specifically, a Utility is not permitted to terminate service due to non-payment of any customer in the Utility's designated weather station area during an extreme weather period. An extreme weather period is a period of 72 hours, beginning at 6 a.m. on any given day, comprised of three consecutive 24-hour segments during any one of which the temperature, as forecast, is not expected to exceed 32 degrees Fahrenheit or is expected to be 95 degrees Fahrenheit or above. Determination of the existence of an extreme weather period must be repeated every 24 hours at 6 a.m. *See* COMAR 20.31.01.02B (8), COMAR 20.31.03.03E, and 20.31.03.04.

B. ADDITIONAL TERMINATION RESTRICTIONS IN 2008-2009

Within the context of Case No. 9175, which was discussed in detail in the Report on Residential Customer Terminations, Arrearages, and Reconnections in Maryland (October 2008-September 2009), the Commission, in Order No. 82628, defined the payment plan parameters and termination procedures that the five investor-owned utilities would be required to follow beginning in April 2009. Specifically, the Commission directed BGE, Pepco, Delmarva, AP, and WGL ("Remaining Utilities") to offer a flexible payment plan, free of interest or late fees during the pendency of the plan, to each requesting customer that had not yet been terminated, whether the customer contact came before or after the Utility issued a termination notice. The Commission directed the Remaining Utilities to offer interest-free and late fee-free payment plans of up to twelve months, with each plan to be tailored to the customer's individual circumstances, and to strongly encourage, but not mandate, the use of "budget billing" (even monthly payment plans) in conjunction with the extended payment plans. Under the terms of Order No. 82628, the Remaining Utilities could not require any down payment from customers whose service had not previously been terminated, from customers who had made payments within the last 90 days, or from customers who had not defaulted on previous payment plans. For customers who had defaulted on earlier payment plans, been terminated, or not made payments for at least 90 days, the Remaining Utilities could require up to a 25 percent down payment. As proposed by the parties and approved by the Commission, customers who later defaulted on an offered payment plan would not automatically be subject to accelerated payments, but would be entitled to one "reset"

Report on Residential Customer Terminations,
Arrearages, and Reconnections in Maryland
(October 2009 - September 2010)

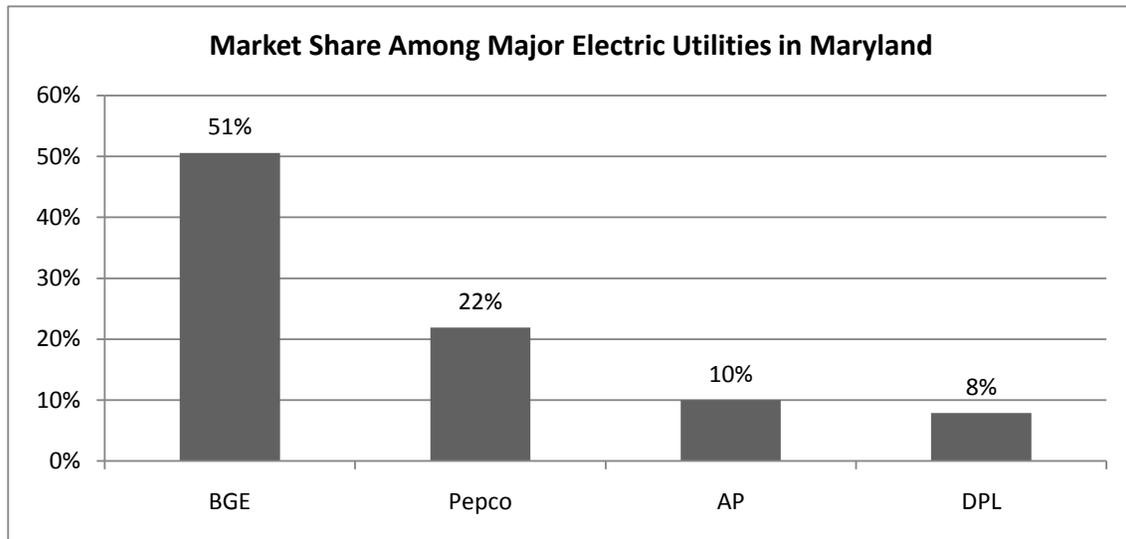

prior to disconnection of service to allow customers to bring the debt current by paying all outstanding payments under the payment plan while also keeping current on new charges.

On November 23, 2009, the Commission issued Order No. 83027, in which, among other things, it clarified that the measures adopted in Order No. 82628 were temporary, were intended to provide relief to those customers affected by higher-than-expected 2008-2009 winter heating bills, and were not intended to impose ongoing requirements. However, some of these alternate payment plans may have remained in effect during the 2009-2010 period described in this report.

IV. ANALYSIS

A. MARKET SHARE AMONG MAJOR ELECTRIC UTILITIES IN MARYLAND

The chart below shows the average residential market share among the major electric utilities in Maryland as of September 2010. With 1.1 million residential customers, BGE serves approximately one half of the residential electric customers in the State.

B. WINTER WEATHER AND ECONOMIC CONDITIONS

During 2009-2010, residential customers experienced a colder-than-normal winter for the second consecutive year, in addition to continuing financial strains resulting from a severe global and national economic downturn. According to a review of National Weather Service temperature data for the Baltimore area, average temperatures for the

Report on Residential Customer Terminations,
Arrearages, and Reconnections in Maryland
(October 2009 - September 2010)

2009-2010 winter months of November through February were colder than those for the previous four years. The winter temperature data for the Baltimore area are summarized in the table below.

Baltimore Area Average Winter Temperature (°F)⁹

	2005 - 2006	2006 - 2007	2007 - 2008	2008 - 2009	2009 - 2010
November	48.1	49.6	46.2	45.4	49.7
December	34.0	42.4	37.8	38.5	34.8
January	41.5	39.1	35.4	29.3	32.7
February	36.1	29.1	37.1	37.4	30.9
Winter Weighted Average	40.0	40.2	39.1	37.6	37.1

The colder weather in winter 2009-2010 resulted in a higher number of heating degree days (“HDD”)¹⁰ for the season in comparison to the previous four years. Heating degree days data for past winters are summarized in the table below.

Baltimore Area Winter Heating Degree Days (HDD)¹¹

	2005 - 2006	2006 - 2007	2007 - 2008	2008 - 2009	2009 - 2010
November	502	456	559	584	451
December	955	692	835	814	929
January	720	767	909	1,103	993
February	802	1,000	799	768	947
Winter Weighted Average	745	724	777	820	830
Total HDD Days	2,979	2,915	3,102	3,269	3,320

C. ARREARAGES

1. Gross Residential Customer Arrearages

The following graph illustrates the increase in the cumulative gross residential arrearages among all Utilities between October 2007-September 2008; October 2008-September 2009; and October 2009-September 2010. Comparison of the winter heating seasons (November through March) shows the gross arrearage trend rising during the winter period. Arrearages in April and May 2010, the two months immediately following the 2009-2010 heating season, show a 10 percent decrease compared to the same two

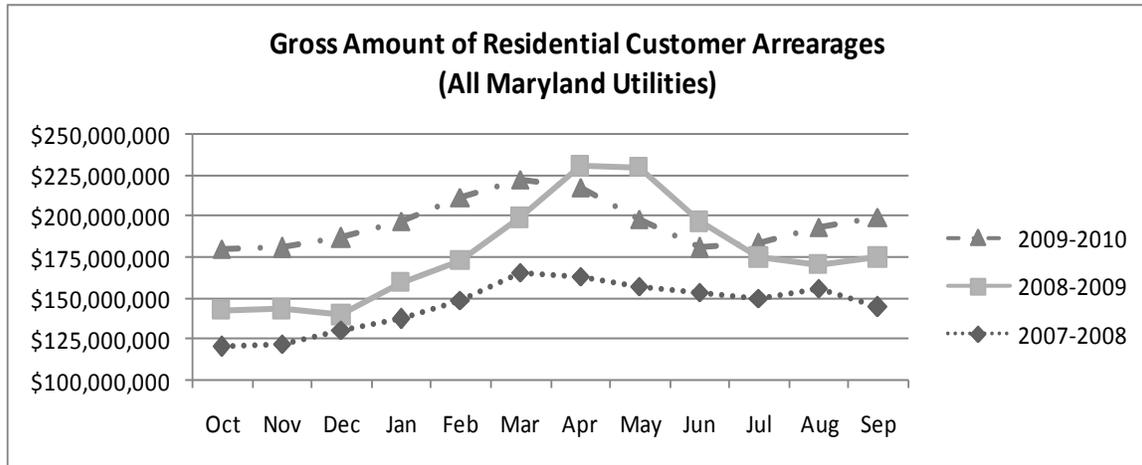

⁹ Source: National Weather Service Forecast Office, <http://www.weather.gov/climate/index.php?wfo=lwx>

¹⁰ A heating degree day is a unit for estimating the demand for energy required for heating or cooling. In the United States, the typical standard indoor temperature is 65°F (18.3°C). For each 1°F decrease or increase from this standard in the average outside temperature, one heating or cooling degree day is recorded. For example, if the average outside temperature for a day is 60°F, it records as 5 HDD; if it is 70°F, it records as five cooling degree days (“CDD”).

¹¹ Source: National Weather Service Forecast Office, <http://www.weather.gov/climate/index.php?wfo=lwx>

Report on Residential Customer Terminations,
Arrearages, and Reconnections in Maryland
(October 2009 - September 2010)

months following the 2008-2009 heating season. It is difficult to determine with certainty the cause of the 10 percent arrearage decrease.

The table below shows the cumulative gross arrearage data broken down by major Utility and, for purposes of comparison, the statewide average for all of the State's Utilities. The numbers below are an average of the gross arrearages for the timeframes specified in the column to the left. BGE accounted for 54 percent of the average gross arrearage in 2009-2010. Pepco accounted for 19 percent; Delmarva accounted for 8 percent; and AP accounted for 8 percent. The Statewide average for October 2009-September 2010 is 10 percent higher than that for October 2008-September 2009.

Gross Arrearages – Major Utilities

	Statewide	BGE	Pepco	DPL	AP	WGL
October 2008 - September 2009 (Average)	\$178,017,719	\$91,644,416	\$32,041,580	\$14,096,249	\$14,453,765	\$11,515,747
October 2009 - September 2010 (Average)	\$195,962,206	\$105,629,969	\$37,866,687	\$15,351,790	\$15,356,404	\$9,856,721

2. Percentage of Residential Customers with Arrearages

The following table reports the percentage of customers on average with arrearages for each major Utility, as well as the overall average percentage of customers with arrearages among these Utilities. The percentage of customers with arrearages increased, or remained the same, from 2008-2009 to 2009-2010 for all five of the major Utilities: 9 percent for Pepco; 8 percent for DPL; 7 percent for BGE; 4 percent for AP; and the percentage of WGL customers with arrearages remained the same as the prior year. Overall, the percentage of major Utility customers with arrearages increased by 7.5 percent in 2009-2010 as compared to 2008-2009.

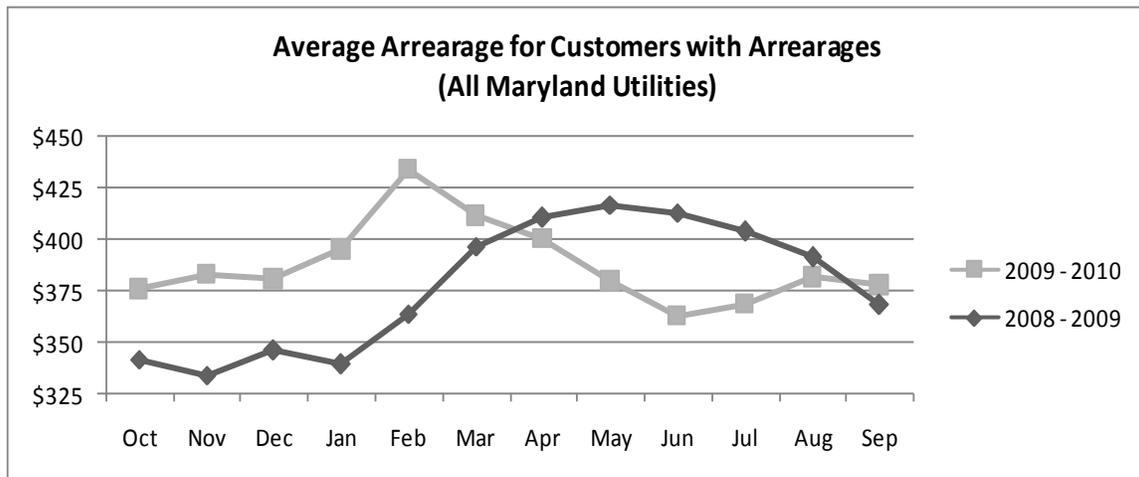

Report on Residential Customer Terminations,
Arrearages, and Reconnections in Maryland
(October 2009 - September 2010)

Percentage of Customers with Arrearages – Major Utilities

	Statewide	BGE	Pepco	DPL	AP	WGL
October 2008 - September 2009 (Average)	17.8%	11.5%	21.2%	22.4%	36.4%	12.7%
October 2009 - September 2010 (Average)	19.0%	12.2%	22.7%	24.1%	37.4%	12.7%

3. Average Arrearage Among Residential Customers with Arrearages

The average arrearage among residential customers with arrearages indicates the degree to which individual customers are behind on their bills. The following graph compares the average monthly arrearage among customers with arrearages in 2008-2009 with the average monthly arrearage among customers with arrearages in 2009-2010. As shown, the average arrearages in the winter months (*i.e.*, October - March) of 2009-2010 were higher than for the corresponding months in 2008-2009. During the summer months (*i.e.*, May - August), however, the average arrearage level was less in 2010 than in 2009. The Statewide average monthly arrearage reached its highest level – approximately \$435 – in February 2010, during the winter heating season.

The following table compares, for each major Utility, and on a Statewide basis, the average amount owed by a customer who was in arrears in 2009-2010 with the average amount owed by a customer who was in arrears in 2008-2009. These figures were calculated by dividing the applicable average gross arrearage by the average number of customers with arrearages. The average amount owed in 2009-2010 increased for BGE, Pepco, DPL, and AP as compared with the average amount owed in 2008-2009.

Report on Residential Customer Terminations,
Arrearages, and Reconnections in Maryland
(October 2009 - September 2010)

However, the average amount owed in the 2009-2010 period by WGL customers decreased from the prior 12-month period.

Average Customer Arrearage

	Statewide	BGE	Pepco	DPL	AP	WGL
October 2008 - September 2009 (Average)	\$379	\$720	\$319	\$364	\$182	\$225
October 2009 - September 2010 (Average)	\$388	\$777	\$347	\$367	\$186	\$191

D. TERMINATIONS

1. Termination Notices

Some Utilities are more aggressive than others in using termination notices to motivate a customer to pay past due amounts before an arrearage gets so high as to become unmanageable. Utilities generally refrain from terminating service following issuance of a termination notice when the customer agrees to a payment arrangement.

The following table illustrates that each major Utility experienced an increase in the percentage of its customers to whom it issued one or more termination notices during 2009-2010, compared with those same figures for 2008-2009.¹²

Percentage of Customers Receiving One or More Termination Notices

	Statewide	BGE	Pepco	DPL	AP	WGL
October 2008 - September 2009	9%	11%	6%	7%	5%	8%
October 2009 - September 2010	12%	16%	8%	9%	7%	11%

As a result of Commission Order Nos. 82509 and 82628, Utilities were prohibited from terminating residential customer service from March 11, 2009 to April 24, 2009. Some representatives of the Utilities stated during Case No. 9175 hearings (held in October 2009) that this prohibition resulted in fewer termination notices and delayed the termination process for several months. This could explain the substantial increases in terminations during the 2009-2010 period (*see* Appendix, Table 1). In other words, it is

¹² The data is presented as a percentage of a Utility's customers because raw numbers may be misleading, insofar as the total number of customers for each Utility varies, and some customers receive multiple notices of termination.

Report on Residential Customer Terminations,
Arrearages, and Reconnections in Maryland
(October 2009 - September 2010)

possible that terminations that would have occurred during the 2008-2009 period were postponed to 2009-2010.

2. Terminations of Service

The following table illustrates an overall increase in the number of residential service terminations in Maryland in 2009-2010 on a statewide basis. BGE, DPL, AP, and WGL experienced increased customer terminations whereas Pepco experienced a slight decrease in terminations.

	Statewide	BGE	Pepco	DPL	AP	WGL
October 2008 - September 2009	80,530	30,687	13,616	4,460	7,464	13,841
October 2009 - September 2010	103,912	44,417	13,459	5,551	8,762	17,810

The table above shows the following:

- Between 2008-2009 and 2009-2010, the number of terminations across the State increased by 23,382 customers, or 29 percent;¹³
- For BGE: terminations constituted 43 percent of the 2009-2010 Statewide total, and there was a 45 percent increase in BGE terminations in 2009-2010 as compared with 2008-2009;
- For Pepco: terminations constituted 13 percent of the 2009-2010 Statewide total, and there was a 1 percent decrease in Pepco terminations in 2009-2010 as compared with 2008-2009;
- For DPL: terminations constituted 5 percent of the 2009-2010 Statewide total, and there was a 24 percent increase in DPL terminations in 2009-2010 as compared with 2008-2009;
- For AP: terminations constituted 8 percent of the 2009-2010 Statewide total, and there was a 17 percent increase in AP terminations in 2009-2010 as compared with 2008-2009;
- For WGL: terminations constituted 17 percent of the 2009-2010 statewide total, and there was a 29 percent increase in terminations in 2009-2010 as compared with 2008-2009.

¹³ The five investor-owned utilities accounted for 86 percent of terminations statewide, with the remaining 14 percent of terminations coming from cooperatives, municipal utilities, and small gas companies.

Report on Residential Customer Terminations,
Arrearages, and Reconnections in Maryland
(October 2009 - September 2010)

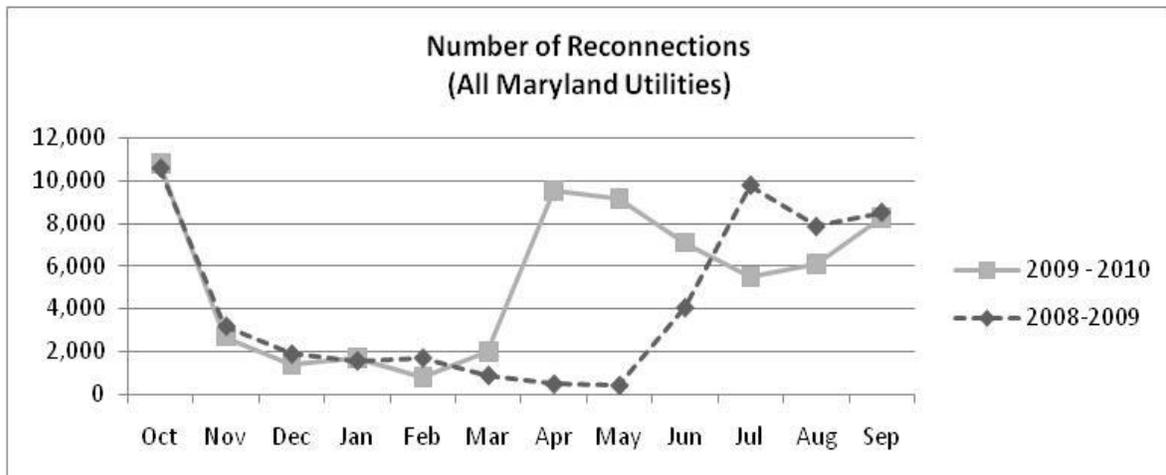

3. Percentage of Residential Customers with Terminations

The following table illustrates the number of service terminations expressed as a percentage of each Utility’s residential customer base. More customers’ services were terminated across the State in 2009-2010 compared to 2008-2009.

	Statewide	BGE	Pepco	DPL	AP	WGL
October 2008 - September 2009 (Average)	3.1%	2.8%	2.9%	2.6%	3.4%	3.4%
October 2009 - September 2010 (Average)	3.9%	4.0%	2.8%	3.2%	4.0%	4.4%

E. RECONNECTIONS

During 2009-2010, the number of customers whose service was terminated for non-payment was 103,912; of those terminated, 64,595 customers (61%) were reconnected. By comparison during 2008-2009, there were 80,530 customers whose service was terminated for non-payment, of which 50,734 customers (63%) were reconnected. The graph below shows month-by-month comparisons of reconnections for 2008-2009 and 2009-2010. The peak level of reconnections for 2009-2010 occurred in April whereas the peak level of reconnections for 2008-2009 did not occur until July.

Report on Residential Customer Terminations,
Arrearages, and Reconnections in Maryland
