## Maryland Piedmont Reliability Project Developer Files Application with Maryland PSC

**For Immediate Release:** December 31, 2024

**Media Contact:** Tori Leonard | [tori.leonard@maryland.gov](mailto:tori.leonard@maryland.gov)

(BALTIMORE, MD) – PSEG Renewable Transmission LLC has filed an application today with the Maryland Public Service Commission seeking authority to construct the Maryland Piedmont Reliability Project (MPRP), a high-voltage transmission line, in the state.

PSEG has applied for what is known as a Certificate of Public Convenience and Necessity (CPCN), which, if granted, authorizes an applicant to construct an energy generating station or high-voltage transmission line in Maryland. More information on the CPCN process can be found at:

<https://www.psc.state.md.us/electricity/cpcn-information/>

Comments received before the case's filing will be added to the public comments file of the docketed case so that the Commission has the benefit of the public's views. The Commission is expected to soon issue a notice of pre-hearing conference, in which the procedural schedule in this case will be set, and the Commission will consider petitions to intervene and other matters.

The Commission's process going forward will include public hearings, held by the Commission, in the counties where the project is proposed to be constructed. The Commission will provide notice of its hearings and other proceedings on its website ([psc.state.md.us](http://psc.state.md.us)), in the docket for Case No. [9773](#), and through the news media and social media channels.

Going forward, written comments may be submitted as follows, under Case No. [9773](#): <https://www.psc.state.md.us/make-a-public-comment/>

###

### **About the Public Service Commission:**

*The Maryland Public Service Commission regulates electric and gas utilities and suppliers, telephone companies (land lines), private water and sewer companies, passenger motor vehicle carriers for hire, taxicab companies in some jurisdictions and bay pilot rates. The Commission implements the energy policy of the State and also regulates the siting of energy generating facilities and high-voltage transmission lines.*
